# Aura Air

The smartest air management solution for enterprises

Hundreds of satisfied business

## Claiming our right to clean air

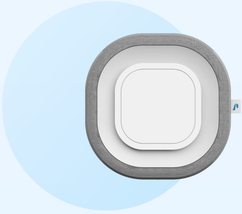

With a quest to live healthier, Aura developed the world's leading air management system, one that purifies your indoor air while vigilantly monitoring its quality in real-time.

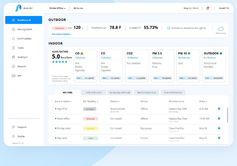

Aura Air is the best wall-mounted device on the market, with its design making it possible to filter air from all directions and target airborne viruses throughout the space. Cutting edge in design, the device is remarkably simple to install and effortless to operate.

## Why Aura Air?

### 4 Stage Purification Process

Includes a Pre-filter, Patented Ray Filter, Sterionizer, and UVC LED that creates a powerful disinfection process.

### Smart Air Management System

Easily control multiple devices at once with our accessible web platform and the Aura App that can be customized for each user.

### Scientifically Proven

Innovative Bioanalysis Lab in California found that Aura Air purifiers kill 99.99% of viruses, bacteria, and allergens, including SARS-COV-2.

### Full Connectivity

ura's smart air management system has an open API and works well with Alexa, Google Assistant, IFTTT, and various BMS (building management systems).
